pimecrolimus price usa

I am 55 and I have been experiencing eczema throughout my face for more than 5 years now. Before I was prescribed Elidel I have tried many different topical solutions that claimed to stop eczema in no time, but the majority of them simply caused no effect on my skin condition, while the others provided some relief but soon my eczema returned with new strength. With Elidel cream everything is quite different. It is my medication, if I can say so. I use it at least twice a day to keep my eczema under control. It helps me extremely well, especially in comparison with the other drugs.
